RESPONSE TO AMENDMENT

1. Claims 1-12, 14-26 and 28-30 are pending in the application, claims 23-26 and 28-30 are withdrawn from consideration. Claims 13 and 27 have been cancelled.
2. Amendments to the claims, filed on May 3, 2006, have been entered in the above-identified application.

REJECTIONS

3. **The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.**

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-12 and 14-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In the instant case amended claims 1 and 14 contain(s) the limitation “unfilled openings.” The specification does not disclose that the openings are excluded from

Art Unit: 1772

being unfilled. In fact the original filled claims state that the holes were filled, see canceled claim 13, therefore this limitation is considered new matter.

Any negative limitation or exclusionary proviso must have basis in the original disclosure. See *Ex parte Grasselli*, 231 USPQ 393 (Bd. App. 1983), aff'd mem., 738 F.2d 453 (Fed. Cir. 1984). The mere absence of a positive recitation is not basis for an exclusion. Any claim containing a negative limitation which does not have basis in the original disclosure should be rejected under 35 U.S.C. 112, first paragraph as failing to comply with the written description requirement. MPEP § 2173.05(i)

The new matter should be deleted.

6. Claims 1-12 and 14-22 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The fact that the apparatus is an electronic packaging and the heat sink and heat sources are layers or materials in the packaging are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). It is essential that Applicant claims limitations found in the specification because it is the heart of the invention. The claims as written read on any type of insulation.

7. Claim 12 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The amendment of claim 1 makes the subject matter of dependent claim 12 not enabled. Applicant has not provided information in the specification of how a layer of glass beads would stay together without having filled openings. That is without a binder or adhesive of some kind between the glass beads, i.e. filled openings, how do the glass beads stay between with heat source and the heat sink.

Claim Rejections - 35 USC § 102

8. Claims 1, 11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Petersen (U.S. Patent No. 3,736,769).

Petersen discloses an apparatus (*cooling device, title*) comprising a unitary layer of electrically non-conductive material (*outer covering, col. 2, line 34*) having a first surface adjacent a heat sink (*core of cold storing material, col. 2, line 19*), a second surface adjacent a heat source (*animal or human, col. 1, lines 4-5*), and a plurality of unfilled openings (*air-permeable nonwoven fabrics, col. 2, line 34 and col. 3, line 43*) communicatively coupled between the first surface and the second surface, wherein a combined area of the plurality of unfilled openings are deemed to comprises a selected percentage of the first surface.

ANSWERS TO APPLICANT'S ARGUMENTS

9. Applicant's arguments in the response filed May 30, 2006 regarding the previous rejections of record have been considered but are moot since the rejections have been withdrawn.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1772

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
